

## Contact Comes with Enlightenment

By [James Gilliland](#)

Many have asked the question, "What does enlightenment have to do with contact?" In all due respect, why would an advanced race of beings want to communicate with a knuckle dragger with no reference points? Simple logic would bring one to the understanding that if a race did not destroy themselves due to an imbalance of technology over spirituality, which recent archeological finds show we have done in the past, they would evolve into a very telepathic, spiritually enlightened civilization. Who would they contact? Would it be the enlightened ones on this planet?

Open minds and loving hearts are the necessary ingredients for benevolent contact. The benevolent ones do not want to further any one agenda, government or religion, which answers the question why they have not landed in the Vatican or the White House lawn. They do not believe in structured truths which create separation, division and sometimes war in endless power struggles. They have transcended all religious and cultural boundaries into a profound love for all people and all life. They acknowledge the Creator in all creation and inherent within their spiritual evolution there is a commitment to service. They are like interstellar and interdimensional galactic ambassadors existing on a vibrational continuum all the way back to the very source itself. They honor the prime directive contacting only those who are evolved enough to understand their messages and motives.

Unfortunately the seeds of truth concerning UFOs and other interdimensional contacts are buried under layers of misinformation and over active imagination. In time, the truth will surface as truth always does and trying to hold it down will only pressurize it with a grander release later.

The rest of the world openly acknowledges the existence of UFOs and their part in their ancient history. Encounters with UFOs are recorded in ancient rock drawings, clay tablets, sacred texts and even within the Bible. The fiery chariot Elisha ascended in, the pillar clouds that were afire by night, the light that came out of the firmament with bronze feet like calves that sounded like a thousand rushing rivers with fire and brimstone coming from beneath, the wheels within wheels with flashing lights all around them and the references to the Pleiades, Orion, Sirius in Amos and Job, etc. all have to do with other spiritually and technologically advanced beings. Of course there were a few negative encounters as well from a few tyrannical groups, and those in need of genetic material with different agendas, yet overall the contacts played an important part in the advancement of our present society. Even many technological break throughs like the transistor, fiber optics, microwave, etc. have now been undeniably proven to come from back engineered technology from downed ET crashes. Top officials in all walks of life are now coming forward with this information.

(please see "[The Day After Roswell](#)" by Philip J. Corso)

We are at a pivotal point in evolution where our technology has greatly advanced beyond our spirituality. We have created weapons of mass destruction so powerful they can tear the very fabric of space and destroy all life on earth affecting other planes, dimensions and advanced civilizations living right along side of us we know not of. We are also taking this technology into space which deeply concerns our heavenly hosts. This is why the sightings have increased a thousand fold for they believe a planet and a civilization is a terrible thing to waste. This however is not the focus of this article. The focus is spiritual evolution and a process that is underway.

I was honored to be a speaker at the International UFO convention and talked about the spiritual aspects of contact. My presentation was followed by J.J. Hurtak author of Keys of Enoch. The genetic evolution of which he spoke followed the same information in my books. Spiritual progression of contact by spiritually and technologically advanced civilizations matched almost exactly what is happening here at the center. It began after a Near Death Experience (NDE) and contact with many of the known masters from within. This was followed by the Shekinah or feminine energies such as Mother Mary, Quan Yin, Buffalo Calf Woman, etc. soon followed by Pleiadian and Orion contact. We have had constant contact with Mother Mary documented with photographic evidence on our website. Contrary to popular belief she is a universal being not owned by any one religion.

We have video taped the ships from the Pleiades and Orion with day and night footage with sound. Now the enormous triangular Andromedan ships which are mythologically known as Archangels are coming to visit. The latest encounters are with the Hathors which are interdimensional, the apex of feminine energies traced back as far as the first dynasty of the Egyptians. They are exquisitely beautiful and their faces are carved into the recent temples discovered in Egypt which date back much further than the pyramids.

They all carry a universal message. Their focus is universal peace, brother/sisterly love and to honor the Creator in all creation. It is the same message handed down by every enlightened master that ever walked the Earth. Could it be that they were the inspiration behind the masters? Could it be that we have screwed up that message in endless intellectual rhetoric, structured, organized and twisted it for power and control? Have we allowed those who seek power and control throughout the various business, governmental and religious organizations to forget the basics? Have we become too material minded, allowed money and those who control the money to be the manifesting force behind destiny? Have we allowed the warlords, scientists and the arms industry creating over 68% of the worlds arms to dictate our future? Have we become too material minded choosing competition and material acquisition seeking love, joy, acceptance and approval through outer appearances as an unbalanced way of life? Is it not wiser to find love, joy acceptance and approval within. Have we in our competitive nature been willing participants turning a blind eye to actions at the expense of humanity and the earth? Is there such a thing as impeccable integrity anymore? Could there be a reaction and karma concerning this path? Is it not wiser to choose to be governed through spiritual advancement rather than money and might?

Mother Mary said, "Peace shall not come through governments or religions but through the hearts and minds of the people." Maybe it is time to choose peace, cooperation and service in the highest good of humanity and the earth holding our governments and religions to the same goals? Maybe our spiritually and technologically advanced visitors have gained wisdom through their own evolution and are here to add their higher consciousness and energy to the pot? Are they here to share some wisdom, release the past and raise the frequencies on earth to insure the upward spiral of evolution? Could they see something ahead like cosmic influences and events we need to prepare for? Maybe it is all of the above? Are you curious or of fixed opinions based on recycled ignorance, dogma and fear? Are you part of the problem or part of the solution? We have a choice to participate in the upward spiral of evolution into Universal Peace and Brother/Sisterly love with a strong reverence for life in all forms. The other option is the downward spiral of separation, fear, greed and ignorance. It is a time for choosing.

### ***From an Alien Perspective***

There are many who ask the questions if there are aliens why don't they land on the White House Lawn or during the Super Bowl. To help us understand the answer let us look at it from an advanced alien perspective. Lets take a mythical interview from Halial Supreme Ambassador and captain of the Galactic Confederation...

I am Halial. When we came to study Earth we found many interesting rituals we are still trying to understand. When we first came we saw a large gathering of people sitting in a multi level circular formation. This formation is good to unify energies and unite in a common good. The people of Earth were all watching other Earth humans on a field of grass.

These Earth humans divided themselves into two teams. They ran as fast as they could and tried to inflict as much damage as possible slamming into each other over control of a dead animal skin filled with air. The humans in the multilevel circle seemed to also be divided cheering for one side or the other while eating what analysis has shown us to be stuffed intestines of another animal with the meat from the animal that used to wear the skin they were fighting over.

They also drink a depressant, a liquid that made them act real strange and pee a lot. They also sit in the same circle and watch other Earth humans hit another stuffed animal hide with a wooden stick then run in circles. Might be an ancient Sufi ritual. They fight over possession of another larger inflated animal skin and toss it through a hoop. In other places they take turns kicking it around. I wonder if they know it is already dead? We don't understand why they would unify in a circle then divide or idolize and fight over a dead animal skin. They seem to be obsessed with competition, domination and control.

We decided to find the leadership of these primitive people. We went to a large round white building that scans showed to be the center of government. We scanned to find

intelligence and integrity. What we found was corruption, dishonesty, obsessions with drugs and sex, long histories of engaging in actions that were very harmful to humanity and the Earth even to the point of selling arms to both sides of wars they inspired.

It seems Earth humans worship and exalt this kind of behavior because their leadership is a reflection of this kind of behavior. In our search to find a higher authority we found there was an elite. Several families that run everything behind the scenes. Our scans showed them to be even more corrupt. Their lust for power and material wealth was insatiable and they would not rest until they owned and controlled everyone and everything.

We decided to find the protectors, those who were sworn to protect the citizens. We first tried the military then the civilian agencies. What we found out was they were also controlled by the elite and cooperated with the plans of the elite. Even if it meant mass genocide or harming their own families and friends, these agencies would employ deadly force on whoever the elite asked them too. Had to do something with an oath to God and country. We have not yet figured out what killing the other expressions of God have to do with God's will or how it serves the country to diminish freedom or create pain, suffering and loss to those within the country but we think it has something to do with worshipping dominance and control misassociating it with intelligence and power.

What we found is that there was something else people worshipped even more than those who controlled the dead animal skin. There were these little green pieces of paper as well. Thoughts of this little green piece of paper took up most of their thought process. Even their actions and energies were mostly spent in acquiring these little green pieces of paper.

What little energy was left was used for mostly unsuccessful attempts at mating. What we also could not understand is how so many believed their survival depended on these green pieces of paper. The elite controlled and printed these little green pieces of paper. We found it amazing that people would trade tangible objects of value for them. They would even destroy their environment and each other for these little green pieces of paper.

All attempts to assist them in cleaning up the air, water and land through free energy and other methods have been met with violent opposition. We even picked up a few throughout history, taught them the basic universal principles necessary for a healthy society and environment. Left them as wayshowers but they killed them and later created a religion around them altering their message to fit their needs.

We shared with them our way which would have created a quantum leap in evolution. Our leaders are chosen according to their spiritual awareness and dedication to service. We honor our children's unique purpose and give them everything they need to excel in their gifts. They are also taught there is no separation in life, to respect all life and to serve the Creator in all creation. They willingly share and give back to society. We have transcended all material lack and live in abundance.

All attempts to share this knowledge has been met with violent resistance. We would show up in our triangular ships only to find Earth humans unreachable. They were caught up in another triangle. The victim, saviour, persecutor triangle. They would not even question the role projected upon them and act it out in an endless loop.

Attempts by other benevolent off world visitors were also met with dishonesty, violence and ill intent. It seems all the Earth human wants is advanced weaponry to evolve further into the worship of control and dominance. We decided Earth humans were not to be engaged but were to be isolated until further study. We quarantined the solar system and set up beacons to warn others not to land or engage this primitive society.
