

The Template (Part 1)

Self Mastery in the Christ Consciousness

An Andromedan, Pleiadian, Orion Alternative

The template is not a demand, a cult, or a document by which to judge others. It is a way of life that follows Universal Principles and Understandings necessary for a healthy society and environment. It is a gift on high from those who have transcended the problems experienced today on Earth such as disease, famine, homelessness and war. It is a way that inspires and promotes Universal Peace, Brother/Sisterly love, Joy, Individual Freedom and Prosperity for All. It transcends all religious and cultural barriers while honoring both religious and cultural diversity knowing that diversity is the spice of creation.

The way is in the very words just written; it is in the heart of hearts of all Humanity for everyone in their heart of hearts desires love, joy, peace, individual freedom and prosperity as well as a closer connection to their Creator. The source of this information is unimportant; it is equally unimportant to give it a name or image. What is more important is to read it with an open mind and loving heart and feel whether or not it resonates in the soul as wisdom.

There are Universal Principles or Natural Laws inherent in creation or the Natural world in which we live. If we live in accordance with these laws, we live in accordance with nature and God, for the Creator is omnipresent within all creation. As a collective we have in error separated God from Nature and Nature from God. We have also separated God from ourselves and our fellow man/woman. These separations are the root or base cause for our pain and suffering. War, disease and poverty all stem from the false belief in separation. There are other false beliefs which will also be addressed for over time man/woman have become very confused, complicated and very creative in a myriad of expressions which do not serve the greater good. These understandings will help correct that imbalance and usher in a spiritual, wholesome, natural way of life. There have been many masters, saints and sages who brought these Universal Principles and Understandings to every culture. The greatest saints, sages, masters and mystics transcended all cultural and religious boundaries into a universal love for all people and all life. Rather than choose any one name, image or doctrine which often leads to separation, the judgment, condemnation and demonizing of others or in the worst case war, we have found it a more equitable approach to focus primarily on the Universal Principles and Understandings found within all teachings. Focus on that which empowers the individual to make his or her own personal God connection and inspires and promotes Universal Peace, Brother/Sisterly love, Individual Freedom and Prosperity for All, as well as a healthy balanced society and environment. I am sure you are catching on for the Universal Principles and Understandings have already been given. They are that simple. Honoring and following them with impeccable integrity is the hard part. There are three basic tenants that if honored and followed with impeccable integrity would solve all the ills of Humanity and the Earth.

- Love God with all your heart.
- Honor each individual as a unique expression of God.
- Behave as if the God in all life matters.

Before we can accept this understanding as a way, each of these tenants must be further clarified. There has been so much confusion about these basic tenants, alterations by kings and institutions to fit their needs, and intellectual rhetoric added throughout history that they have become lost or buried under a mountain of confusion. They were often referred to in the past most simply as the Law of One.

Love God with all your heart.

To love God with all our hearts we must understand the true nature of God. There are so many images attributed to the absolute which is in its most unlimited understanding truly nameless and has no image. There is a saying that God created man/woman in its own image and likeness, "In Spirit." There is another saying that man created God in his/her own image which is why there are over 11,000 religions and images. There have been so many images passed down through history it has become quite confusing. There is the wrathful jealous God, the punishing God and the God of infinite love, compassion and forgiveness. There are also deities throughout the various cultures which represent the different aspects of God. So how can we agree on the image of God? What kind of image can we unite with that will foster Universal Peace, Brother/Sisterly Love, Joy, Individual Freedom and Prosperity for All? What kind of image can we become one with, love and fully immerse ourselves in? It must be an unlimited image to reflect the unlimited nature of God. We cannot love God and fear God at the same time for perfect love casts out all fear. If we are afraid of the wrath and punishment of God how can we fully immerse ourselves? It seems in order to Love God with all our hearts we need a new image. This is a more unlimited understanding of God, yet there is not a name, image or collection of words spoken or written that can define the infinite expression of God. This is a humble attempt to bring one closer to understanding the Great Mystery.

The Father/Mother God principle known as life is the one consciousness that encompasses all consciousness. It is Omnipresent on all planes and dimensions throughout the multiverses. In its most unlimited expression it is pure unconditional love and joy, BLISS. It is like the sun shining its golden rays of love and joy on all people and all life, the source of all life. It does not have and is beyond the ego which judges good or bad, right or wrong. The infinite love, joy, compassion, and forgiveness is unchanging, never ending and always assured in God. The images of a wrathful punishing God are misperceptions of the past and in error. We live in an Action/Reaction world known as the plane of demonstration where consciousness creates reality. We manifest and magnetize people and events into our daily lives according to our attitudes, emotions and beliefs in the world in which we live. Gods favorite words are, "As you wish," manifesting and becoming the clay for your creations. Jesus once said, "As you believe, so it is." Buddha spoke, "We are what we think; all that we are arises with our thoughts; with our thoughts we create the world." Quantum

physics is now revealing what the ancient mystics have known for thousands of years. Rather than giving blame or credit to God or a devil for everything, maybe it is time to take responsibility for our attitudes, emotions and actions. Take charge of the God given gift of freewill directing that will in the highest and best good of Humanity and the Earth with impeccable integrity. God in its most unlimited expression is again Pure, Unconditional Love, Joy and BLISS. Those who have transcended the body and the personality through meditation, near death experiences (NDEs) and other spiritual practices have experienced this Pure Golden Consciousness and Energy often referred to as the plane of BLISS or the Cradle of God. Let thine eye, (6th seal or chakra) be single and make Love, Joy and Bliss your focus until you become it. Self discipline with focus and feeling is the path to the Source of all life which is infinite in love, joy, compassion and forgiveness.

Honor each individual as a unique expression of God.

It is written that man/woman are created in the same image and likeness of God. The light that lighteth every man/woman is the light of God, and Ye are all Gods. This is another understanding in Omnipresence. Loving thy neighbor as ourselves is loving God and ourselves for there is no separation in Omnipresence. Each individual is a unique expression of God and that diverse expression adds to the whole of Creation making a more unlimited Creator, (honor diversity). Every individual is God expressing each in one's own unique way. When that expression is nurtured and allowed to excel along with an attitude of service it adds to the whole causing a quantum leap in evolution. It is said that there are two reasons for everything, love and lack of love. There are two motives for all behavior fear and love. We do not deny the fact that in some expressions love is not the manifesting force behind creation and many actions are not in alignment with the Universal Principles and Understandings necessary for a healthy society and environment. Fear, adversity, separation, and competition versus cooperation are found in all walks of life. These expressions are created out of fear, lack of love and need healing, education and redirection. In the worst case scenario boundaries and isolation may be necessary for those who choose a destructive path out of respect for the safety and well being of others. They must first be given every opportunity to be heard and heal as long as there is a sincere desire through process oriented therapy. The wounds and traumas need expression and release not suppression and control which is to be kept at a bare minimum and only in worst case scenarios. In truth man/woman are multidimensional beings existing on a vibrational continuum in more expanded states of awareness, love, joy and Bliss all the way into oneness with Source. Healing the wounds, traumas, misperceptions and wrong conclusions from past experiences allows one to expand beyond the personality and body to experience the true self.

Behave as if the God in all life matters.

The Creator is omnipresent within all creation. We cannot separate one from the other. By believing God is separate from nature and life in all forms and putting material acquisition, technology, and our own selfish gain as first priority we are unbalanced and

living in separation. Most scientists agree that our present civilization is not sustainable and we have a few short years left if we continue on our present course. The present condition of our environment and escalation of Earth changes, Nature's attempt to heal, is testimony of this. The oceans are polluted, major fish populations and algae are disappearing, coral reefs are dying around the world, red tides are creating massive fish kills and dolphins and whales are beaching themselves. Our own rivers are showing the same toxic side effects. The forests are rapidly disappearing due to clear-cut logging, fires and man's intrusion not to mention the poisoning of the land and the air with herbicides, pesticides, carbon dioxide and powerful carcinogens. Even our own immune systems are on overload with new strains of mutating virus and bacteria which are now impervious to modern antibiotics. We have to admit somewhere we took a wrong turn in our evolution and now is the time to correct our course. There is a wholesome natural way to live in harmony with Nature. There is a balance, a sacred circle of life that must be maintained in order for a healthy environment and society. This balance and love of life in all its forms insures the continuation of every advanced civilization. The opposite insures its inevitable demise. Separation, greed and the gross uneven dispersal of wealth and actions which are not in the highest and best good of Humanity and the Earth must end. Now is the time to ask what good are all the material acquisitions in the world if a man/woman loses their soul? What good are all the material acquisitions in life if the platform for life ceases to support life?

Could it possibly be that simple? Could accepting three simple tenants and living them as a way of life end pain, suffering, disease, poverty, etc.? It is even simpler than that. The chosen ones are those who chose and remained steadfast in that choice despite the whole of the world. It takes courage and impeccable integrity applied in everyday living which is the greatest challenge.

Just focus on Love until you become love and let love be the manifesting force behind all creation honoring the sacred circle of life. Allow selflessness and service to replace selfishness. It is the path to sustainable living, abundance for all, health and well being. There is one source, one planet, one people. It is that simple. Maybe if we get it right here we can join the rest of the universe.
